ABOUT ME

I am a recent BSc-IT graduate with a strong foundation in web development (HTML, CSS, JavaScript) and Python. Throughout my academic journey, I developed practical experience by building several web applications and personal projects. Passionate about technology, I am eager to leverage my skills in a dynamic, growth-oriented role while continuing to learn and develop in a professional environment

PROJECTS

Architectural Firm (Web Application) -	July 2023 - March 2024
<ul style="list-style-type: none">• Created and maintained a user-friendly web application for an architectural firm, where clients can explore available services, place orders, share feedback, and ask questions.• Focused on improving the overall user experience and streamlining communication between the firm and its clients.	
Student Record System (Web Application) -	June 2021 - December 2021
<ul style="list-style-type: none">• Student Record System is a web-based technology that manages student databases and provides rights to update the details. In this web application, Students must be registered by admin.• This web application provides a way to effectively control records & track student details.• Student Record System is software which is helpful for students as well as the school authorities. In the current system all the activities are done manually. It is very time-consuming and costly. Our Student Management System deals with the various activities related to the students.
